Tender Details

Reference: OLT2128186

Description: Purchase, and removal of Various ferrous scrap material at Lethabo Power Station on a Once-OFF agreement

Closing Date: 2026-05-28 10:00

AI analysis available

Your proposal will be personalised to the extracted tender requirements.

Summary: Eskom invitation to purchase and remove various ferrous scrap material from Lethabo Power Station on a once-off agreement. The tender is issued by ESKOM and closes 2026-05-28 at 10:00.

Requirements:

Preference System	80/20
CSD Registration	Required
Tax Compliance	Required
Locality Preference	Free State
Certifications	Proof of public liability / third-party insurance (likely required), Proof of Occupational Health & Safety compliance or SHEQ documentation (likely required), Scrap dealer / transporter licences or permits (if applicable)

Service Categories:

Purchase and removal of ferrous scrap material (required)

Mandatory Documents:

CSD registration summary report (or CSD number)

Tax clearance / SARS TCS Pin (or tax compliance status)

B-BBEE certificate or sworn affidavit (if applicable)

Company registration documents (CIPC) or proof of trading entity

Letter of authority / resolution to sign on behalf of company

Pricing schedule / Form of Offer

Proof of public liability insurance

Proof of health & safety compliance and relevant SHEQ documents

References or proof of experience in scrap removal/handling

Evaluation Criteria:

Price: 80 points

Risk Flags:

Closing deadline: 2026-05-28 10:00 — strict and immediate risk if full documents not obtained in time.

No tender document text was available for extraction — essential details (scope, checklist, contract value, timelines, method of award) are missing and must be obtained from Eskom before preparing a bid.

Potential compulsory site briefing or inspection not listed in metadata — missing a compulsory briefing may lead to disqualification.

Environmental, access, security and permit requirements for on-site scrap removal are likely but not specified; non-compliance could prevent contract performance or payment.

Company Fit Assessment:

Unknown

Overall fit: Weak. Strengths: B-BBEE Level 1 (full 20/20 preference benefit) is a strong commercial advantage. Gaps: no declared scrap-removal service, no CSD/tax compliance shown, Western Cape base (tender preference: Free State), small turnover and no proven public-sector scrap experience—critical operational, insurance and SHEQ documents are missing.

Purchase and removal of ferrous scrap material (mandatory tender category)

Scrap dealer / transporter licences and permits

On-site removal logistics, plant & equipment (cranes, trucks, weighbridge processes)

SHEQ / OHS compliance specific to industrial scrap removal

References / demonstrated experience in scrap handling at power stations

Action Items:

Company Profile

Update Profile

90% Good — 1 field missing. Complete your profile for better proposals.

Company: fow

Entity Type: Pty Ltd

Industry: Construction

Province: Western Cape

B-BBEE Level: 1

CSD: Registered

Tax Compliant: Yes

Employees: 6-20

Annual Turnover: <R1M

Past Projects: None on record

Additional items:

- Obtain the full Eskom tender document and checklist immediately (confirm scope, mandatory MBD forms, site briefing requirements and contract value) — deadline 2026-05-28 10:00 is strict.
- Confirm and upload CSD registration and SARS tax compliance (TCS Pin) — these are commonly mandatory for submission.
- Secure/confirm required insurances and SHEQ documentation: public liability/third-party insurance and OHS/SHEQ certificates specific to industrial scrap removal.
- If the company does not provide scrap removal operationally, form a JV/subcontract with a Free State-based accredited scrap dealer/contractor who can supply licences, plant, weighbridge arrangements and references; prepare a subcontracting agreement and letter of intent.
- Prepare mandatory company documents for tender submission: CIPC registration, letter of authority/resolution to sign, pricing schedule/Form of Offer, B-BBEE certificate or sworn affidavit, and references for scrap handling.
- Clarify VAT requirements, pricing basis (VAT inclusive/exclusive) and payment/invoicing terms with Eskom; structure pricing competitively given 80% price weighting.
- Attend any compulsory site briefing/inspection (confirm dates) and document site access, security, environmental and permit conditions for Lethabo Power Station.
- Collect and document past projects or partner references demonstrating capacity for on-site heavy-material removal; if none, provide equipment rental agreements and CVs of key personnel to strengthen functionality claims.
- Obtain transport and environmental permits for movement and disposal/recycling of ferrous scrap; confirm who bears weighbridge and transport costs and reflect these in the pricing.
- If tender documents cannot be obtained in time or capability gaps remain, decline or pursue as subcontractor to a compliant Free State operator rather than prime bidder.

⊕ Additional Context (optional)

Key Strengths for This Tender

e.g. 10 years experience in water treatment, local presence in Limpopo...

Relevant Past Projects

e.g. Completed similar project for Mogalakwena Municipality in 2024...

Team Members to Highlight

e.g. John Smith (Project Manager, 15 years experience), Dr. Patel (Technical Lead)...
